

Example Worksheet: The Kitchen Sink

Slides

Iliad Intensive

July 16, 2026

What this deck demonstrates

- ▶ A `slides.tex` in a worksheet folder is compiled to `slides.pdf` by the build.
- ▶ The page shows a *Slides* row: view, download, and the LaTeX source.
- ▶ Math renders as usual: $H(p) = - \sum_x p(x) \log p(x)$.

That's it

Edit `slides.tex`, rebuild, refresh.
